DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Wednesday, 06 September 2023 at 09:48 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Widespread Moderate air pollution likely across the UK on Wednesday as the hot, settled conditions continue and south-easterly winds bringing a continental feed of air.

Tomorrow: Widespread Moderate air pollution expected to persist across the UK on Thursday as the hot, settled conditions continue.

Outlook: Light winds and very warm conditions expected to lead to continued widespread Moderate air pollution in England and Wales to end the week, increasingly reaching High levels locally, more especially for Northern Ireland on Friday, perhaps locally Very High across England and Wales by Saturday. Air pollution levels looking to reduce somewhat by Sunday as more unsettled and cooler weather begins to move southeast across the UK.
